Questions:

What colors will be used?

- Answer: The color of the two lines will be orange, the same color of the line following assignment. Same paper. The other line will be the blue paper. The targets will be the best three colors I can come up with, I listed green, pink and yellow (but I need to test the green) I will finalize this on Wednesday morning before the quiz when I set up the room.
- I am also going to attempt to build a white wall around the outside of the playing field, not sure how to do that yet, but I'm going to attempt it.

Can we use other visual targets to help with navigation?

• Yes, outside the playing field you can put a visual target to help with navigation, whatever you want, but it has to be outside the border of the field.

How does the scoring crossing the field wor?

• -4 points each. If you go from one side to the other side you get five points and this has nothing to do with obstacles. If you miss the obstacles you can get another 8 points, but if you hit an obstacle you get 4 points taken off, the second obstacle 4 more points, third obstacle nothing happens you already lost your max points.
